PROJECT EXPERIENCE

As a recognized expert in the analysis and resolution of complex construction disputes, Mr. Britven has evaluated claims on numerous types of projects, both in the U.S. and internationally, involving construction and schedule delay matters, commercial litigation, intellectual property and asset matters, and energy related matters. Representative projects include the following:

Construction / Schedule Delay Matters

- Developed and assessed claims by a pipeline owner and a pipeline contractor involving multiple disputes and cross claims.
- Performed a management audit of the Big Dig roadway construction project.
- Developed and assessed multiple road and bridge claims in connection with interstate highway expansion projects in the state of Florida.
- Determined business interruption and lost profits, including related impact on financing due to construction defects in an airport runway that caused a shutdown of a regional airport.
- Developed controls used in a pipeline construction project. Audited contractor invoices to ensure appropriate accounting methodology and accuracy.
- Audited subcontractor's pipeline construction costs in accordance with terms of pipeline construction contract. Determined contract balance owed to owner based on amounts incurred by subcontractor and subcontractor's unpaid amounts to third-party vendors.
- Developed claims related to construction defects on a condominium project and determined cost of project delays, as well as the related impact on condominium unit sales.
- Determined replacement power costs as a result of delayed start-up of coal-fired electric utility due to construction and design defects.
- Formulated a project execution plan for pipeline construction companies. Project execution plan involved development of a system for project controls and procedures as well as an audit plan to test the project controls and procedures and ongoing project costs.
- Evaluated additional construction costs and delay claims in connection with a large outfall tunnel construction project.
- Determined additional piping and project delays costs as a result of piping subcontractor termination on a processing facility project.
- Developed a delay claim for recovery of additional costs related to a military sonabuoy program.
- Evaluated program status, delay and overrun issues related to a military contract for night vision equipment.
- Determined restoration costs, business interruption lost profits and mitigation adjustments related to a fire and explosion at a large oil refinery and adjacent chemical facility.
- Assessed asbestos removal and an additional cost and delay claim submitted by a contractor in connection with a remediation project.

Commercial Litigation

- Traced historical business transactions and asset title in connection with claims of breach of contract, fraud and misappropriation of trade secrets related to gas centrifuge technology. Reviewed representations made

by multiple business entities pertaining to ownership and existence of the gas centrifuge technology and determined whether indicia of fraud were present in such representations.

- Assessed decline in stock price and future earn-out damages associated with multiple claimed acts of misrepresentations in connection with an acquisition of a line of consumer car-care products.
- Investigated allegations that executives of a large public waste company intentionally inflated its stock price by releasing unreasonable earnings estimates.
- Quantified damages resulting from the withholding of restricted securities in association with an acquisition of a Phase I/Phase II biotechnology firm.
- Assessed a damages claim in connection with a NASD matter.
- Evaluated damages in connection with claims of breach of contract, trade dress misappropriation and unfair competition pertaining to the distribution of caskets to funeral homes.
- Determined damages resulting from a failed software implementation, maintenance and development program.
- Calculated the amount of lost profits and excess costs incurred by plaintiff as a result of a defendant's early termination of multiple purchasing contracts.
- Analyzed subrogation of lost profits by an insurance company as a result of an explosion of a power-generating facility and the subsequent claimed business interruption loss of a steel manufacturing facility, its suppliers and its customers.

Intellectual Property / Asset Matters

- Determined lost profits and reasonable royalty related to multiple patents and unjust enrichment related to false advertising claims involving GPS enabled semiconductor products.
- Calculated the amount of reasonable royalty damages due to infringement of a patent related to the chemical composition of a generic injectable pharmaceutical product for anesthesia. Analyzed defendant's lost profit, reasonable royalty and price erosion damages counter-claim.
- Figured up-front payment and running royalty damages due to patent infringement of a drug discovery screening technology.
- Calculated reasonable royalty damages and assessed plaintiff's lost profit and reasonable royalty damages claims related to a patent infringement matter involving two major market competitors and multiple patents related to balloon catheters and cardiac stents, including drug-eluting stents. Also quantified false patent marking statutory damages in connection with a related counter-claim in the case.
- Determined lost profit and reasonable royalty damages in connection with a patent infringement claim involving six patents related to ultrasound methods and technology and accused products that spanned various segments in the ultrasound market. Also determined reasonable royalty damages related to counter-plaintiff's patent infringement assertion involving four ultrasound technology patents.
- Determined reasonable royalty damages related to spinal cord stimulation technology used in medical devices. Also assessed lost profit and reasonable royalty damages claimed by plaintiff.
- Determined unjust enrichment head start damages as a result of misappropriation of trade secrets and unfair business practices involving a cardiac rhythm management start-up business.
- Assessed reasonable royalty and lost profits claims involving multiple cardiac rhythm management companies involved in multiple litigations based upon extensive study of industry practices and licensing agreements.

- Developed licensing strategy with NASA contractor interested in commercializing space shuttle technology.
- Analyzed reasonable royalty in a matter involving a patent for 802.11a, 802.11g and draft 802.11n wireless LANs.
- Calculated reasonable royalty damages in connection with a patent infringement claim involving multiple patents related to features included in consumer telephone products.
- Estimated appropriate royalty base and reasonable royalty related to multiple patents involving multilevel antennas, space-filling antennas, loaded antennas and multiband monopole antennas used in cellular phones.
- Calculated reasonable royalty damages related to browser-capable smartphones, which incorporated patented technology originally intended for scanning bar codes.
- Determined reasonable royalty damages for prepaid cellular telephone technology. Assisted client in the preparation of product line profitability analysis and assessed reasonable royalty claims developed by multiple licensing and damage experts.
- Determined reasonable royalty damages resulting from the use of wired and wireless telecommunication vending technology.
- Prepared a mediation presentation on potential patent infringement and trade secret misappropriation damages in a case involving real-time monitoring and analysis of streaming media.
- Assessed reasonable royalty damages in a patent infringement case involving technology that encrypts pay-for-TV content.
- Assessed damages due to trademark infringement and unfair competition related to amplification components for acoustic-electric guitars.
- Determined trademark and trade dress damages in a matter involving energy shots.
- Calculated the amount of damages due to a breach of contract concerning a skin care product line and associated trademark. Analyzed historical sales trends, projected future sales and calculated future royalties.
- Determined damages as a result of a misappropriation of trade secrets related to an electronic security and surveillance company.
- Determined the amount of reasonable royalties due to patent infringement involving a course management system patent and two of the primary competitors in the enterprise eLearning solutions market.
- Assisted with the damages quantification assessment involving a patent prosecution malpractice matter involving patented technology for application in the worldwide intermodal railroad market.
- Determined reasonable royalty damages related to methods for recording, storing and retrieving digital voice data transmitted over telephone or other communication lines. Also assessed plaintiff's lost profit and reasonable royalty claims.
- Calculated damages sustained by an engineering consulting firm as a result of ex-employees' wrongful conduct including misappropriation of trade secrets and other confidential information. Damage analysis involved determination of lost profits on specific lost accounts, disgorgement of the defendants' revenues and assessment of the overall business impact on the engineering consulting firm as a result of the defendants' actions.
- Assessed damages as a result of misappropriation of trade secrets related to an education software platform in the K-12 market. Damage analysis involved determination of the avoided research and development

costs, disgorgement of the respondents' revenues and assessment of the incremental value associated with the alleged trade secrets based on a cost-over-cost analysis and purchase price allocation of the programs incorporating the subject technology.

- Determined the amount of trade secret and patent damages as a result of misappropriation of trade secrets and patent infringement related to a foreign specialty water chemicals company. Calculation of trade secret damages involved determination of profitability associated with the chemicals allegedly incorporating the trade secrets based in part on an understanding of inter-company transactions with the parent company.
- Assessed damages as a result of misappropriation of trade secrets related to subsea oil and gas service company.
- Determined the amount of reasonable royalties due to patent infringement involving multiple air-jet weaving machine patents and assessed reasonable royalty and lost profits claimed by plaintiff.

Commercial Litigation / Other Matters

- Determined damages related to a claim and counterclaim involving false advertising and unfair competition.
- Performed management audit involving large roadway construction project.

Energy-Related Matters

- Valued natural gas pipeline in connection with redistribution of ownership interest as a result of joint venture partners' decision to opt out of future capital expansion projects. Valuation was based on a complex discounted cash-flow model and an assessment of comparable transactions among other things.
- Audited natural gas contract to ensure appropriate accounting methodology and accuracy.
- Evaluated a \$1 billion plus damage claim related to natural gas trading and marketing venture. Analyzed the nature, classification and value of trading transactions. Also performed accounting and business record fact finding relative to specific transactions in dispute and assessed disclosures contained in annual reports and SEC findings.
- Determined value of salt dome natural gas storage facility while serving as a "third-party appraiser." Valued facility as a stand-alone business enterprise after adjustment for shared facility and overhead expenses.
- Developed forward price curves used to value a client's gas, power and oil derivative contracts (including commodity and basis swaps). Analysis of changes in the market-to-market value of positions was used to assist in the resolution of multiple claims between two major trading and marketing organizations.
- Calculated breach of contract damages associated with natural gas processing and purchase contracts. Determined well-connection costs, well deliverability, well capacity, and compression maximums. Also analyzed gains to producers from gaming nominations to pipelines.
- Audited subcontractor's pipeline construction costs in accordance with terms of a pipeline construction contract. Determined contract balance owed to owner based on amounts incurred by subcontractor and subcontractor's unpaid amounts to third-party vendors.
- Analyzed breach of contract claims related to volumetric production payments in exchange for mineral rights and interests in natural gas and natural gas liquids derived from multiple wells located in Nebraska. This analysis included a calculation of the residual value of the wells based on monthly production rates and total recoverable gas reserves.
- Calculated the amount of lost profit damages due to a steel manufacturer as a result of its energy trading and marketing service provider's failure to execute contracts placed for the future purchase of natural gas. Verified the amounts of natural gas delivered and paid as a result of prior transactions and determined the additional costs incurred as a result of the steel manufacturer's failure to mitigate.

- Developed a project execution plan for pipeline construction companies. Project execution plan involved development of a system for project controls and procedures as well as an audit plan to test the project controls and procedures and ongoing project costs.
- Analyzed claims of fraudulent conveyance, breach of contract, preference actions and conversion of collateral. Determined the amounts, timing and circumstances surrounding natural gas received, and payments made between an oil and gas forward contract merchant and multiple insolvent gas marketing entities during the ninety-day period prior to bankruptcy filing. Traced funds between various entities and bank accounts to establish whether third party letters of credit were satisfied for payments for alleged fraudulent conveyances of natural gas.
